AKHILA CHENNAMANENI

Aspiring IAM and GRC Analyst

Stamford, CT | 203-524-5588 | ch.akhilarao@gmail.com | linkedin.com/in/akhila-chennamaneni-228651236

PROFESSIONAL SUMMARY

Salesforce professional with 4+ years of experience across Salesforce administration, consulting, and business analysis. Skilled in configuring and customizing Salesforce Org environments, leading data migrations, designing automation and security models, and translating business requirements into scalable CRM solutions. Proven ability to collaborate with cross-functional and geographically distributed teams, gather requirements through structured elicitation techniques, and drive Salesforce adoption through training, reporting, and process improvement. Strong communicator and problem-solver with a continuous focus on learning and growth. Currently expanding into cybersecurity through a hands-on Identity and Access Management (IAM) and Governance, Risk and Compliance (GRC) capstone program, applying access governance, risk management, and security monitoring principles to a simulated healthcare environment.

CORE COMPETENCIES

- Identity and Access Management (IAM): RBAC design, least-privilege access, identity lifecycle, Keycloak administration
- Governance, Risk and Compliance (GRC): risk registers, control mapping, HIPAA Security Rule and NIST CSF 2.0, managed in CISO Assistant
- Salesforce Org configuration, administration, and customization (custom objects, fields, page layouts, record types, validation rules)
- Process automation using Flows, Process Builder, Approval Processes, and Workflows
- Data migration and management using Data Loader, Data Import Wizard, and ETL processes
- Salesforce security and sharing models: profiles, permission sets, roles, sharing rules, field-level security
- Reports, dashboards, and data analytics to support business decision-making
- Requirements gathering and elicitation, functional documentation, and User Story writing
- Agile/SDLC methodologies, User Acceptance Testing (UAT), and change management
- Nonprofit Success Pack (NPSP) and cross-functional stakeholder collaboration
- CI/CD deployment management using change sets and Azure DevOps

CYBERSECURITY TRAINING & CAPSTONE PROJECT

Cyber Security Cohort — IAM/GRC Track ***June 2026 – Present***

dae | Cohort-Based Learning, Cyber Security | Connecticut

dae is a Connecticut-based nonprofit innovation studio functioning as an immersive school, community hub, and incubator, providing project-based learning and mentorship to help learners build the technical skills and professional capabilities needed for careers in emerging technology fields.

Capstone Project: *Care Access Navigator — IAM + GRC Healthcare Cybersecurity Capstone*

- Designing and building a simulated IAM/GRC environment for a fictional hospital (HealthLine Regional Medical Center), covering identity lifecycle management, access governance, threat intelligence, vulnerability management, risk management, and security monitoring/incident response over a 12-week engagement.
- Deployed and configured Keycloak as the identity provider, implementing a 7-role RBAC model (Clinician, Nurse, Billing, HR, IT Support, Security Analyst, Vendor) and designing OIDC-based federation with Microsoft Entra ID.
- Performed vulnerability assessments and network reconnaissance with Nmap, and conducted malware behavioral analysis (VirusTotal) mapped to MITRE ATT&CK threat groups, including SilverTerrier and Orangeworm.
- Ran a controlled phishing simulation using the Social-Engineering Toolkit (SET) in a Kali Linux lab to demonstrate credential-harvesting attack paths and inform user-awareness recommendations.
- Built and maintain the GRC program in CISO Assistant: a risk register on a 5×5 matrix, controls mapped to the HIPAA Security Rule and NIST CSF 2.0, 43 evidence files, exceptions and corrective actions, plus incident response documentation following the NIST IR lifecycle (Identify, Contain, Eradicate, Recover, Lessons Learned).
- Designed a segmented, defense-in-depth network architecture (6 functional VLANs) with perimeter firewall/IDS/IPS, TLS/IPsec VPN, WAF, 802.1X access control, and MFA/mTLS at the identity layer.

- Tracked deliverables and evidence in Monday.com and versioned documentation/configuration artifacts in GitHub, producing rubric-aligned reports and architecture diagrams for a professional portfolio.

PROFESSIONAL EXPERIENCE

Salesforce Consultant ***April 2024 – May 2026***

Waste Management

- Worked with business stakeholders to gather and analyze requirements and translate them into scalable Salesforce solutions aligned with business processes.
- Participated in migration of business data and processes from legacy and on-premise systems to Salesforce, including data mapping, cleansing, validation, and reconciliation.
- Designed and configured Salesforce solutions using custom objects, fields, page layouts, record types, validation rules, Flow automation, approval processes, and other declarative tools.
- Recommended Salesforce best practices and process improvements to enhance system usability, automation, data quality, and overall business efficiency.
- Supported Salesforce data migration activities using Data Loader, Data Import Wizard, and ETL processes to extract, transform, and load data from multiple source systems.
- Designed and implemented Salesforce security models using profiles, permission sets, roles, sharing rules, and field-level security based on business and compliance requirements.
- Coordinated Salesforce deployments across development, QA, UAT, and production environments using change sets and CI/CD processes through Azure DevOps.
- Created reports and dashboards to provide stakeholders with actionable insights into business operations, performance metrics, and Salesforce adoption.
- Conducted functional testing, supported UAT activities, resolved defects, and validated Salesforce enhancements before production deployment.

Salesforce Administrator ***December 2022 – March 2024***

Solar Youth, New Haven, CT

- Worked in a team to integrate third-party tool Survey Vista into Salesforce; created surveys to manage feedback from non-Salesforce members and track outcomes and targets.
- Worked with record types, page layouts, picklist values, validation rules, dashboards, and reports.
- Worked on an existing Salesforce Org and helped the client evaluate survey solutions with detailed comparisons and recommended approaches.
- Increased user adoption by training users to move from time-consuming Google Sheets to Survey Vista through training sessions and content.
- Performed administration and configuration of the Salesforce platform, including user setup, permission set groups, applications, custom objects, and custom fields.
- Implemented Screen Flows and Record-Triggered Flows.
- Planned and conducted requirement meetings with the business to collect functional and non-functional requirements relating to technology enhancements and initiatives.
- Led business/functional requirement gathering, master data gathering, system configuration, testing, data loading, UAT, and customization of MIS reports.
- Wrote User Stories and provided end-user training, support, and administration of the functional system in the cloud environment.
- Coordinated and performed access control, continuous integration, release and deployment management, and audited configuration changes.
- Used Lucidchart, Excel, and PowerPoint to document business process flows, solution documents, and proof of concepts.
- Provided detailed requirements documents and impact analyses with solution decks outlining architecture, data model, timeframes, and approaches.
- Gained experience with sandbox environments for development, testing, and deploying change sets to production.

Salesforce Administrator Intern ***April 2022 – October 2022***

Open House, New York, NY

- Transferred Salesforce data into business-understandable metrics using reports and dashboards.
- Exported data from the Salesforce Org by creating reports and using Data Loader.
- Performed data cleansing and research on records, storing updates in Excel and re-importing them into the Org using Data Loader.
- Worked closely with the sales team and business analysts to analyze business and technical requirements and design solutions by customizing standard objects.
- Worked with the Scrum team and business stakeholders to translate end-user requirements into technical requirements; created unit test cases and coordinated change requests during integration and testing.
- Used Asana as an SDLC tool to track and update user stories and development tasks.
- Created Screen Flows, Record-Triggered Flows, and Approval Processes for automation purposes.

Salesforce Volunteer ***January 2021 – June 2021***

- Worked on a demo Manufacturing Cloud build for Salesforce MVP.
- Imported data from Excel sheets into Leads, Accounts, Contacts, and Opportunities.
- Used Data Loader, Import Wizard, and scheduling tools to automate bulk data loading.
- Collaborated with senior team members to analyze products and competitors to support new product integration.
- Optimized existing products and imported account and contact data through Import Wizard.
- Involved in Health Cloud implementation and enhanced features to streamline business processes.

EDUCATION

Bachelor of Engineering, Information Technology
Osmania University

PROFESSIONAL TRAINING & CERTIFICATIONS

- Salesforce Administrator Certification — July 2022
- Salesforce Platform App Builder Certification — March 2023
- Certificate on Admin and Analyst — February 2024
- Certificate on Flows — March 2024
- Superbadges: Health Cloud Specialist, Lightning Experience Reports and Dashboard Specialist, Business Administration Specialist, Security Specialist

TECHNICAL SKILLS

- Identity & Security Tools: Keycloak, Microsoft Entra ID, Wazuh, Docker, Kali Linux, Nmap, VirusTotal, Social-Engineering Toolkit (SET)
- Security & Compliance Frameworks: HIPAA Security Rule, NIST CSF 2.0, MITRE ATT&CK
- Operating System: Windows
- Databases: SQL, Microsoft Excel
- GRC Platform: CISO Assistant (risk register, HIPAA and NIST CSF 2.0 audits, evidence, exceptions, dashboards and reports)
- Project Management Tools & Methodology: Asana, Agile, Jira, Monday.com
- Collaboration Tools: Slack, Confluence, GitHub
- Interface Tools: Data Loader, Workbench
- Salesforce: Reports and Analytics, Automation and Security, Data Loader, NPSP, CI/CD (Azure DevOps)
