

Status Update for Semester 2, Week 3 by Akhila

Day	Tasks for the Day	How Much Was Accomplished?	What Next?	How to Proceed?
Monday 08/03/2026	1.This week I started to work deeper on the selected role of IAM Analyst and decide on a project that to be done in upcoming months. 2. In that process started to work on Project Design document which is to be completed and pushed to gitHub	1.Shortlisted some projects, got approval from Educators on one and started to work on a design document. 2.My Project is Care Access Navigator which is Healthcare IAM, ePHI Access Governance and Incident Monitoring.	1.Complete the project design document and push it to the GitHub repository. 2. Learn more about the project and timelines. 3. Want to brainstorm to do another project on GRC role if things align as planned.	1.Focus on finalizing technical specifications and configuring the repository structure along with working on the complete requirements and Objectives. 2.Work with Educators and discuss the various possibilities.
Tuesday 08/04/2026	1.Started document work on Monday.com Project board . 2.Learning about the tools and Technology going to be used in the project.	1.Half way done with upload on Monday.com and trying to finish the project updates. 2.Learning about Keycloak, Microsoft Entra ID, Lucid Charts etc.	1.Working with Educators to complete the project documentation and get the feedback. 2.Also started to explore Certification Paths and resources.	1.In order to complete the document, working with various resources like Claude, ChatGPT, Notebook LM. 2.For certifications found resource GaleUdemy website which could offer courses and practice tests for free when accessed through library cards.
Wednesday 08/05/2026	1. Working on the feedback given by Educators and finished the document. 2.Started Learning about CyberSecurity Certifications.	1.Almost done with the document but did not get the approval, working on it. 2.Started studying from GaleUdemy for CompTIA security+ Cert.	1. Keep working on the project board . 2. Research deeper and learn more about the project.	1. Submitted another modified version of Project board and waiting on for the feedback. 2.Exploring more resources to learn hands on skills for Cyber Security and also gain more practical knowledge.

Day	Tasks for the Day	How Much Was Accomplished?	What Next?	How to Proceed?
